Lead Software Developer, Impossible Bureau

2019–2020

Javascript (native ES6, Babel), Three.js, WebGL, GLSL, WebAssembly, C++, C, HTML, CSS, npm, React, React Boilerplate, Python, Blender, Sketch, Procreate

- Provided general experience, team leadership, and broad expertise to small team of web developers working mostly in React
- Integrated custom WebAssembly/WebGL workflow into React project, including build scripts integrated into standard React deployment and server-side compiling of WebAssembly.
- Utilized Three.js for loading and programmatically animating GLTF 3D models in a React web stack

Game Developer, Ultramegatronix

2010—Present

C++, C, BGFX, GLFW, CMake, Xcode, OpenGL, OpenAL, GLSL, Metal, iOS, Apple TV, Playdate, macOS, Windows

- Between freelance clients, make small-scale games with own custom engine.
- Shipped two games now—Flipominos for Apple TV and iOS in 2016, and Envelop for iOS in 2012—with many more just waiting for my time and attention.

Software Developer, Struck

2007 – 2010

Flash, AS3, HTML, CSS, JavaScript, iOS

- Worked mostly in Flash and AS3, but also did a fair amount of HTML/CSS/JavaScript.
- Worked on my first iPhone apps, one of which, LEGO Photo, had over 2 million unique installs within the first few months.
- Worked on projects for Nintendo, adidas, Old Spice and others.

More experience available upon request
